PROFESSIONAL OBJECTIVE

Aspiring technology professional seeking an entry-level position where i can apply my knowledge of artificial intelligence, Machine learning, Data analytics and web development to design innovative,efficient and scalable solution. passionate about leveraging data-driven insights and modern technologies to solve real world problems. Eager to learn and contribute to organizational success through strong problem solving skills, continuous improvement and hands on project experience

TECHNICAL SKILLS

Programming : Python, HTML, CSS, javaScript, React, Node.js

Database : SQL, MongoDB

Tools & Platforms : VS Code, Linux basics, Windows OS, Jupyter Notebook

Mathematical Concept : statistics, probability, Calculas and Data Science

Machine Learning & AI : Generative AI, Classification Models, Random Forest, Feature Extraction, NLP, Data Preprocessing

EDUCATION

Bachelor of Technology (B.Tech) - Artificial Intelligence and Data Science

Dhanalakshmi Srinivasan College of Engineering and Technology

Year of Graduation : 2023 -2027

CGPA : 8.04

PROJECTS

AI-powered Crime spot Analysis and Evidence Recovery : Develop an AI-powered crime scene analysis system that automatically analyzes videos to detect, classify, and locate potential evidence using CNN, resNet .

Smart Public service Management system : Develop an AI-powered public service management system that enables citizens to report civic issues. It automatically routes complaints to relevant department and provides real-time status.

Virtual Interview Assistant : Built an virtual interview assistant that provides a real-time interview experience for freshers and analyzes confidence, facial expressions, communication to provide feedback and evaluate performance.

Intelligent Traffic management system : Develop an AI-based traffic management system that optimize real-time traffic density to dynamically adjust traffic signal timing using yolo and predictive analysis.

Optimizing Ambulance routing system : create a ambulance routing system that identifies the fastest route using real-time traffic and road conditions. Also connected to the hospital server for advance preparation.

EXPERIENCE

Data Science Intern | Vel Tech - Nov 2024

Completed a 1 month internship worked on data analysis and machine learning projects using python libraries.

Hackathan Participant | Inter College Competition - 2024

collaborated in a 5 member team to develop a project for optimizing ambulance routing.

Certifications : Complete the AI course in springboard (Infosys springboard, oct 2025), Completion of python foundation (itronix solutions, sep 2025), Certificate of recognition (Oracle certified foundations associate, oct 2025), completion of MySQL Databases (itronix solutions, sep 2025)
